Title – Quality Technician

Job Description

The Quality Technician is responsible for performing the following tasks:

- Testing of product in accordance with MIL-T, ASTM, & ASME Standards
- Perform or supervise receiving, in process, first article and final inspection of product
- Complete, sign and issue all quality certificates required by customers and management
- Train personnel on Ameritube Quality System
- Perform all analysis of non-compliance, corrective actions and preventative maintenance
- Manage and update our ISO 9001 quality system

The Quality Technician will be inheriting an established quality system and trained personnel. His main job will be to learn the system, maintain its use, and pursue corrective actions or improvements as required. The personnel have been trained in the system but will require retraining periodically as well as training new employees.

Requirements

These are requirements to perform the Quality Technician role:

- Bachelor's degree in technical field preferred, Associates degree required
- Highly organized with a strong attention to detail
- Experience in the quality function at a manufacturing company, preferably with some metal knowledge
- Experience with NDT testing, certifications in eddy current highly preferred
- Experience with calibration of measuring devices, microscope, and tensile test equipment.
- Working knowledge of MS-Office suite particularly Excel
- Working knowledge of ISO 9001:2008 standard

About Ameritube (www.ameritube.net)

Founded in 2004, Ameritube began operations with a core group of managers and employees dedicated to rehabilitating a manufacturing facility and producing a viable and sustainable domestic manufacturing business. Ameritube takes two things very seriously, quality and the made in the USA label.

Ameritube is a growing company where individuals are valued for their loyalty and hard work. Compensation is competitive. Opportunities for advancement are available as the company will continue to grow and new opportunities will develop. The people growing with the company will benefit disproportionately since their knowledge and understanding of the company and its processes will be very valuable in the company's continued growth.
